Section 1: Introduction

1.1 Background

Kaduna State is situated in the North-West of Nigeria with Kaduna as its capital. Kaduna became the "North Central State" in 1967 and Kaduna State was formally created in 1975 by

the then military leader General Yakubu Gowon (rtd). In 1987, Katsina State was carved out of the then Kaduna State. The Kaduna State is politically classified as belonging to the now 'North -West' zone of the current six Geo political zones of Nigeria. The State has Coordinates of 10°20'N 7°45'E, a total of 46,053 km2 (17,781 sq. mi) and is ranked 4th out of the 36 states in size. Its population is about 6.3 million people (Nigerian census figure, 2006) and ranked 33rd out of 36 states with a density of 130/km2 (340/sq. mi). Kaduna State has three senatorial districts and 23 LGAs

Figure 1: Map of Kaduna State with 3 Senatorial Districts

The Kaduna State Government (KDSG) identifies access to essential health services as an important aspect of State development. For KDSG, a healthy populace is critical to socioeconomic development and the establishment of a knowledge-based economy in the State. KDSG's commitment to health is demonstrated by its resolve to promote the delivery of quality health care services across Kaduna State and evidenced by increased budgetary allocations and noticeable improvements in the delivery of quality health care. As the Kaduna State Ministry of Health (SMoH) coordinates the State's health sector policy, plans and strategies, having a focused and strategically aligned corporate plan would position it to effectively deliver on its mandates and contribute to the attainment of universal health coverage (UHC) for the people of Kaduna State.

1.2 Objectives and tasks

The primary objective of the corporate planning process of the Ministry is to review and improve the organizational, institutional and human resources capacities and capabilities to ensure effective delivery of health care services. These will be achieved through the development and implementation of Corporate Plan and Service Charter.

1.3 Methodology

1.3.1 General Approach

Using the corporate planning process, the Ministry looks at itself and ask:

- I. Why it exists its core mandates
- II. What it is meant to be doing its goals and objectives
- III. How it can best organise itself to deliver on its objectives i.e., its structure
- IV. How it plans to achieve its goals and objectives i.e., its key strategies
- V. Who it needs to fit its structure and best deliver its aligned services i.e., its workforce.

1.3.2 Key Steps Adopted

The following five main steps were adopted in the process of preparing the SMoH corporate plan:

- I. Establishment of SMoH Corporate Planning and Service Charter teams which consisted of an ad-hoc Corporate Planning Technical Committee (CPTC) and Departmental Corporate Planning Task Teams (CPTTs).
- II. Organisation of 2-day assignment inception roundtable that utilized Zoom platform for representative senior staff of the SMoH on corporate planning scope, approach, and using relevant corporate planning and service charter templates prepared by the consultants.
- III. Data collection and completion of corporate planning and service charter templates by the CPTC and CPTTs was carried out using field/virtual platform which was facilitated by the consultants.
- IV. Draft SMoH corporate plan was developed.
- V. SMoH corporate plan validation roundtable was conducted.

Section 2: Corporate Planning

2.1 Corporate Planning Concept

Corporate planning is a multifaceted process which can be understood in different ways. But primarily, it is a systematic process, using a structured approach, to agree on, and develop how the Ministry wants to achieve its core mandates. The scope of corporate planning varies with the circumstances of a Ministry and the resource commitment to drive the corporate plan, among other factors. A corporate plan does not document everything on what and how a Ministry functions.

Essentially, a corporate plan helps the Ministry focus on how it wants to operate to achieve its goals and objectives. It gives a high-level focus on key areas regarding the Ministry's core mandates, key functions, strategic direction, and the staffing disposition and performance focus, further details can be obtained from relevant departments or covered in other more specific documents (e.g., health sector strategic plans). The corporate plan guides the management and staff of the Ministry in her cohesive effort to carry out her core mandates. The concepts and fundamental issues in the corporate plan process were examined by the CPTC using the corporate plan framework in figure 2 below and also considers the linkages among Policy and Strategy, Public Financial Management, and Public Service Management.

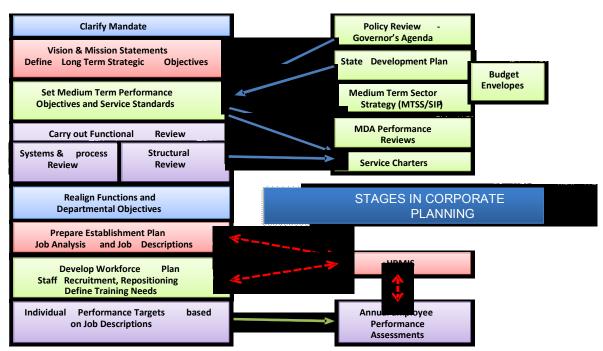

Figure 2 Corporate Plan Framework

2.2 Basis for Corporate Planning

Corporate planning is a review and re-organisation process usually undertaken in response to some sort of change. Such a change could be:

I. A changing environment – political, economic, or financial resulting in a changed level of public funds available,

- II. New technologies which radically affect the way work is done, e.g., ICT.
- III. New mandates, priorities or services required,
- IV. Aging workforce, redundant skills, or other human resource constraints,
- V. New social / cultural norms e.g., public expectations, gender equity, diversity requirements, etc.

Like a medium-term development plan, the corporate plan should be periodically reviewed to address changes that occur over time. It is likely, however, that a major review will be required every five years or thereabout.

Section 3: Mandates

An organisation's mandate is usually confirmed by the highest level of government for example, by the Constitution, a Law, an Executive order or any other legal instrument. A mandate is therefore an authoritative command which forms the basis for developing the organization's Vision, Mission and Core Value statements. The "State Ministry of Health Corporate Plan Zero Draft, 2013" contained ten (10) mandates which were agreed upon but considered inadequate as these mandates did not cover mandates related to the internal efficiency of the Ministry.

3.1 Core Mandates

The Ministry of health was established to support the KDSG in the formulation and implementation of health policies, plans, programmes, and strategies.

The core mandates of the SMoH are, to:

- I. Translate and formulate State government policies and plans on all health matters.
- II. Initiate legislation on health service delivery in the State.
- III. Provide preventive, curative, promotive and rehabilitative health care services in line with government policies and plans.
- IV. Ensure the availability of essential medicines and medical supplies in the State.
- V. Develop and maintain infrastructure for health in the State.
- VI. Ensure the provision and equitable distribution of adequate human resources for health.
- VII. Oversee the State's health training institutions and human resource for health development.
- VIII. Coordinate development partners' activities on all health matters to achieve aid effectiveness.
- IX. Regulate all private health establishments in line with the State and National policies.
- X. Promote the conduct and utilisation of operational research for effective healthcare delivery.

3.2 Internally Linked Mandates for Organisational Effectiveness, Efficiency, and Improvement

The adopted Ministry's powers and responsibilities in the legal notice that originally established it and subsequent related executive conclusions or decisions primarily focus on the public-facing core mandates. Yet, there are internal mandates that are critical to its organisational, administrative, and operational effectiveness, efficiency, performance and improvement. The three adopted internal mandates are:

- I. Provision of infrastructure and physical resources to make the Ministry operate optimally.
- II. Judicious management of human, financial, and other resources of the Ministry.
- III. Building the institutional capacity of the Ministry to optimally perform its mandates based on global best practices.

Section 4: Vision, Mission, and Core-Values Statements

The core mandates define the vision, mission and core values of the Ministry. The core values speak directly to the behavioural dispositions of the management and staff of the Ministry and reflects its character. The vision, mission and core value statements are shown in Figure 3 below.

Vision

To be a leading State Ministry in the provision of equitable, affordable, accessible, and sustainable quality health care services.

Mission

To ensure the delivery of quality health care services to all people in Kaduna State by providing clear policy directions and implementing all necessary health plans with the participation of relevant stakeholders.

Core Values

- **1. Professionalism:** Employ various health professionals who discharge their duties competently in an ethical manner.
- **2. Motivation:** Continuously build the capacity of staff and empower them for improved performance.
- **3. Efficiency:** Uphold timeliness, responsiveness, and the optimal utilization of the resources available in delivering services.
- **4. Client Focus:** Deliver health services tailored to satisfying current and future clients' needs through a holistic approach.
- **5. Integrity:** Engage in consistent actions, methods, and practices which ensure accountability and transparency in service delivery.

Figure 3 Statement of Vision, Mission and Core Values

Section 5: Long-Term Goals, Medium-Term Objectives and Strategies

5.1 Strategy Focus

The strategic direction of the Ministry is influenced by the Kaduna State Health Policy and broadly expressed in such documents as the Kaduna State Health Sector Implementation Plan (SIP). Hence, the strategic direction of the Ministry is 'to build a resilient health system that is responsive to the yearning and aspiration of the health needs of the people in a sustainable manner in response to the overall goal of achieving universal health coverage.' (Source: Kaduna State Health Policy, 2021)

5.2 Key Strategies, Long-Term Goals, and Medium-Term Objectives

The Kaduna State 2022-2024 Sector Implementation Plan comprises of fifteen (15) strategic objectives, and fifteen (15) strategic priorities which the Health Sector is determined to implement in the next three years. The SIP sets out realistic and achievable goals and objectives that are the focal point for driving the actions and activities of the health sector over the next three years.

The following are the strategies as contained in the **Health Sector Implementation Plan** (2022-2024).

- I. To strengthen leadership and governance for sustainable development of Kaduna State health system.
- II. To enhance reproductive, maternal, new-born, child, and adolescent health and nutrition.
- III. To increase and optimise human resources for health.
- IV. To improve health financing.
- V. To improve prevention of, and coordinated response to, communicable diseases (malaria, TB, leprosy, HIV/AIDS) and neglected tropical diseases (NTDs).
- VI. To assure availability of quality medicines, vaccines and other health technologies and supplies.
- VII. To sustain public health emergencies preparedness and response.

The long-term goals and medium-term objectives associated with the above-listed strategies are shown in Table 3.

Table 1: Long-Term Goals and Medium-Term Objectives

S/N	Long-Term Goals	-Term Goals Medium-Term Objectives			
Strat	egy #1: Strengthen leadership and	goverr	nance for sustainable development of Kaduna state		
healt	th system.				
1.					
Strat	Strategy #2: Enhance reproductive, maternal, new-born, child, and adolescent health + nutrition.				

- 2. Universal access to comprehensive quality sexual and reproductive health services throughout life cycle and reduce maternal, neonatal, child and adolescent morbidity and mortality among in Kaduna State promoted.
- Reduce maternal morbidity and mortality through the provision of timely, safe, appropriate, and effective healthcare services before, during and after childbirth.
- II. Strengthen prevention, treatment, and rehabilitation services for fistula care in Kaduna State.
- III. Improve the nutritional status of the people of Kaduna State throughout their lifecycle, with a particular focus on vulnerable groups especially women of reproductive age and children under five years of age.
- IV. Increase demand for, and increase access to, sexual and reproductive health services (family planning and post abortion care).

Strategy #3: Increase and optimise human resources for health.

- 3. Right number and skill mix of competent, motivated, productive, and equitably distributed health workforce provided for optimal and quality health care services.
- I. Effective coordination and partnership for aligning investment of current and future needs and institutional strengthening for human resources for health (HRH) agenda.
- II. Increase availability of adequate numbers of qualified health workers.
- III. Develop monitoring and evaluation systems for HRH, including systems for HRH-IS and Registry.

Strategy #4: Improve health financing.

- Access to health services
 without any financial barriers
 or impediments at the point of
 accessing care ensured for all
 residents of Kaduna State.
- I. Strengthen governance and coordination for actualizing stewardship and ownership of Health Financing reforms.
- II. Increase sustainable and predictable revenue for health.
- III. Enhance transparency and accountability in strategic purchasing of Health Services.
- IV. Enhance financial risk protection through pooled funds in Kaduna State.

Strategy #5: Improve prevention of, and coordinated response to, communicable diseases (malaria, TB, leprosy, HIV/AIDS) and neglected tropical diseases.

- 5. Prevention, case detection and coordinated response for the prevention, control, and management of communicable diseases and NTDs in the State improved.
- I. Significantly reduce morbidity and mortality due to Malaria and move towards pre-elimination levels.
- II. Increase universal access to high quality, clientcentred TB/Leprosy diagnosis and treatment services for the reduction in the incidence and prevalence of tuberculosis/leprosy in Kaduna State.
- III. Significantly reduce the incidence and prevalence of HIV/AIDS in Kaduna State.

Strategy #6: Assure availability of quality medicines, vaccines and other health technologies and supplies.

6. Quality medicines, vaccines, I. Strengthen availability and use of affordable, and other health commodities accessible, and quality medicines, vaccines, and and technologies made other health commodities and technologies at all available, affordable, and levels. accessible to all the people of Kaduna State. **Strategy #7:** Sustain public health emergencies preparedness and response. 7. Public health emergencies ١. Significantly reduce the incidence and impact of preparedness and response public health emergencies. sustained.

Section 6: Functional Review

6.1 Key Functions of SMoH Departments

Making the Ministry fit-for-purpose requires that the key functions of its departments align with its core mandates. Departmental functions should flow from the core mandates to deliver specific outputs or services that are central to the attainment of its mission. Some functions of the departments of the Ministry are shown below.

Mapping key functions of departments to the Ministry's core mandates focus the departments on what is important to the Ministry and optimises resource utilisation. Based on mapped functions, departments can identify and plan for deliverables that help attain the mission and goals of the Ministry.

Table 2: Departmental Mandates and Functions

Mandate	Function	Outputs			
Department of Administration and Finance					
Ensure the provision and equitable distribution of adequate human resources for health.	Coordinating the recruitment, promotion, transfers/ postings, discipline, and retirement of all staff.	List of successful applicants/ List of concerned staff.

Ensure the provision and equitable distribution of adequate human resources for health.	Coordinating posting of newly recruited and existing staff for effective service delivery across all secondary health facilities in the state.	Posting List.
Oversee the State's Nursing & Midwifery health training institutions and health workforce development.	Coordinating maintenance of standards of Nursing practice and education in all Health facilities and Training Institutions in the state.	Routine Spot- checks/ Visit Report.
	Supervising Nursing and Midwifery Council of Nigeria final qualifying examination in the State.	Reports.
	Planning, organising, and implementing Mandatory Continuing Professional Development Programme for Nurses & Midwives.	Number of Nurses & Midwives that participated in the programme

6.2 Mapping of Selected Functions and Processes for Mandates Attainment

Key processes associated with delivering specific outputs or results in the departments are also aligned to foster a 'fit-for-purpose' Ministry. When such processes are aligned with specific deliverables that foster attainment of objectives, further efforts can be made by the departments and the leadership to re-engineer key processes for optimal efficiency.

Appendix 1 shows examples of departmental processes mapped to the core mandates.

Section 7: Structural Review

7.1 Basis of a Fit-for-Purpose Organisation Design

This section leverages on the functional and process reviews and comes up with an optimal and fit-for-purpose organisation structure. This is not limited to the physical abstraction displayed in an organogram but also the collaborative mechanisms to sustain a fit-for-purpose Ministry.

7.2 Top-Level Organogram of SMoH

The core mandates define the mission of the Ministry and its organisational structure which shows the hierarchical relationships of its top tier leadership and dictates how the core mandates are distributed across its key departments.

The core mandates are organised and performed under the following departments:

- I. Administration & Finance
- II. Medical Services
- III. Public Health
- IV. Nursing Services
- V. Pharmaceutical Services
- VI. Health Planning, Research & Statistics

Furthermore, the Ministry supervises the following agencies and health training institutions:

- I. State Primary Health Care Board (SPHCB)
- II. Kaduna State Health Supplies Management Agency (KADHSMA)
- III. Kaduna State Agency for the Control of AIDS (KADSACA)
- IV. Kaduna State Bureau for Substance Abuse Prevention and Treatment (KADBUSA)
- V. Kaduna State Contributory Health Management Authority (KADCHMA)
- VI. Barau Dikko Teaching Hospital
- VII. College of Nursing & Midwifery.

The organogram of SMoH is shown in Figure 4.

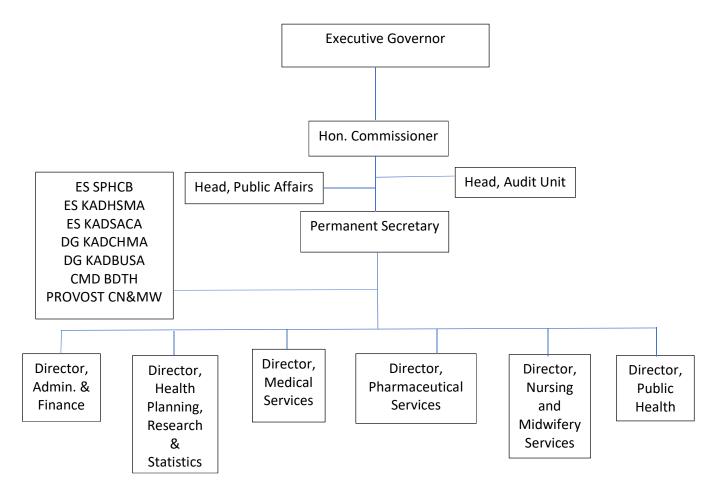

Figure 4: Organogram of SMoH

Each department maintains a departmental organogram which shows the functional relationships of their units, project groups, or task teams, and the roles associated with key departmental functions.

7.3 Corporate Performance Management Committee

The leadership and management staff of the Ministry meet periodically for corporate performance planning, monitoring, and reporting, and to share knowledge, information, skills, and experience to maintain an integrated, agile organisation and a high-performance culture in the Ministry. this help the Ministry to understand and focus on what makes for successful delivery of services to our stakeholders. This mechanism also ensures effective review and evaluation of performance standards to take corrective actions as appropriate where deviations from desired results and standards are seen.

Section 8: Staffing and Staff Positioning for High Performance

8.1 Staffing Structure

The effective staffing of SMoH would be facilitated by having experienced, competent, and well-motivated staff members in key positions. In this regard, the staffing structure matters, particularly for a 'specialist' Ministry like the SMoH. The senior staff members and middle level management (i.e., equivalent to staff members on GL 7-13) are the engine room of such a Ministry and they drive the operational and service delivery processes of the Ministry; they form the bulk of the staff population. Table 3 shows the distribution of SMoH staff members by salary grade levels (equivalent to staff categories) as at May 20, 2022.

Table 3: SMoH Staff Distribution by Grade Levels

S/N	Grade Levels	Number of Staff	Percentage (%)
1.	GL 01-06	10	6.90
2.	GL 07- 13	102	70.34
3.	GL 14 - 17	33	22.76
Total		145	100

Table 3: shows that 70.34% of the SMoH staff members are on GL 7-13 and 22.76% are those on GL 14 and above. The staffing structure is positioned to drive service delivery in the health sector. However, it should be noted that this does not mean that Ministry has adequate number of staffs for its core mandates. this is something that would require a systematic and structured process to determine the appropriate establishment levels in all departments.

8.2 Diversity and Gender Positioning

Table 4 shows the distribution of Staff members by gender.

Table 4: Distribution of Staff by Gender in SMoH

S/N	Gender	Number of Staff	Grade Levels		
		Total No. of Staff (%)	GL 01-06	GL 07-13	GL 14 – 17
1.	Male Staff	89 (61.38%)	10	54 (52.94%)	25 (75.76%)
2.	Female Staff	56 (38.62%)	-	48 (47.06%)	8 (24.24%)
	Total	145 (100%)	10	102	33

According to Table 4, 61.38% of Staff members are male while 38.62% are female. Although there is a wide gap between the percentages of male and female in the general staff population, this reduced among staff members on GL 07 - 13. Of the 102 staff members on GL 07 - 13, 54(52.94%) are male while 48 (47.06%) are female. This proportion bodes well for career advancement of female staff members in the SMoH. However, there is a marked disparity when it comes to senior management stall level (equivalent to GL 14 and above), where 22 (75.76%) of the 33 staff members are male while 8 (24.24%) are female.

While no single Ministry or Agency of the KDSG can decide on the male-to-female ratio of its workforce, the Ministry will work towards optimising diversity and gender positioning in health sector workforce in line with the relevant Nigerian Federal and State policies.

Some of the actions towards facilitating improvement of employment opportunities and career advancement for women and other socially excluded groups in the health sector are:

- I. Collection and analysis of data: A first step will be to collect and analyse data in relation to the current workforce at all grades and locations that will allow an analysis of where there are gaps (such as in the gender balance or numbers of people with disability). This process would involve collaboration with the Office of the Head of Service (OHoS).
- II. **Setting of targets:** The Ministry shall collaborate with other organizations on recommending to the OHoS the minimum percentage of health-care workforce to be made up of qualified women, people with physical disability, etc.
- III. **Review of recruitment and promotion processes:** Where applicable and feasible, there may be a review of the recruitment and promotion procedures in the health sector to facilitate the recruitment and promotion of individuals from underrepresented groups.
- IV. **Review of progress being made:** There shall be a regular review of progress being made (as part of wider health sector workforce planning review) in relation to targets (recruitment, access to training, promotion, etc.).

8.3 Positioning Staff for High Performance

8.3.1 Using Functional Job Descriptions

Effective staff performance management begins with planning. A key staff performance planning tool is using functional job descriptions. A job description states the purpose or essence of a job or position, specifies key duties and responsibilities involved, map the Key Results Areas (KRAs), and indicate the required skills and competencies for success on the position or job.

Job descriptions should be prepared for all key positions and staff performance shall be assessed based on their Job description. To start this process, and to give practical examples for subsequent preparation of job descriptions for key positions in the Ministry, job descriptions were prepared for the following six positions:

- I. Director Admin & Finance
- II. Director Medical Services
- III. Director Pharmaceutical Services
- IV. Director Public Health
- V. Director Nursing Services
- VI. Director Health Planning, Research & Statistics

Details of the prepared job descriptions are contained in Appendix 2.

8.3.2 Work Planning and Target Setting

Work planning is seen as the medium through which jobs are actualised. Duties and responsibilities defined in job descriptions need to be mapped with timelines and targets set on the expected milestones or key performance indicators (KPIs). Agreeing specific performance targets with key staff members is critical to achieving the mandates of the Ministry and getting enhanced performance from its departments. The process of preparing

such performance targets would be through using a target setting format such as the one in Appendix 3.

The target setting template is to be used in conjunction with the job description to effectively focus each job holder on priority duties and performance milestones attached to their positions. Such a template should be completed by each key staff member in collaboration with his or her immediate superior and in line with the departmental key functions and expected deliverables. Targets can be set within the Ministry's performance management review cycle (e.g., quarterly, half-yearly, or yearly), and monitored on an ongoing basis using e.g., departmental and management progress meetings and individual performance feedback.

8.3.3 Evidence-Linked Staff Performance Evaluation

The work planning and target setting process indicated in *sub-section 5.3.2* would enhance the staff performance evaluation reporting system. This is because staff performance appraisal is purposeful and effective when it is linked with clear, understandable, and agreeable evidence. Staff performance on set targets may serve the purpose of quarterly and half-yearly performance monitoring inputs to the performance ratings and records on any key staff member in Annual Performance Appraisal.

Section 9: Service Standards and Service Performance Targets

9.1 Basis for Sustaining a Sound Service Delivery Culture

At the heart of the Ministry's service charter is the effective and efficient delivery on service standards and service performance targets. This will be facilitated through capacity building of service delivery teams and using mechanisms that help focus on, and improve service delivery processes.

9.2 Mechanisms for Improving Service Performance

Mechanisms for tracking and improving performance on service standards and performance goals and targets include the following.

9.2.1 Departmental Service Improvement Plans

Departmental service improvement plans, which document what the departments will do and how they will meet specific service performance targets, including necessary resource implications, are central to formalising and creating an enabling environment for service improvement.

9.2.2 Service Delivery Process Meetings

Service delivery process meetings may be in form of regular departmental service delivery team review meetings to exchange ideas, information, knowledge, and experience on specific service standards and service performance targets, and on improving their service delivery processes. There may also be quarterly service delivery joint team (inter-team) meetings where representative members of service delivery teams in the Ministry meet to interrogate their service delivery processes and share ideas and experience on improving such processes.

9.2.3 Service Targets Calendaring

Service target performance should be ongoing but with milestones and timelines (calendar) for specific aspects or progress to be monitored and attained. This would mean producing service charter performance reports periodically. Doing this would incorporate the use of service performance targets monitoring form like the one shown in Appendix 4. This would benefit from half-yearly stakeholders' forum/roundtable, incorporating the administration of service standards performance appraisal questionnaire, like the one shown in Appendix 5.

9.2.4 Service Performance Scorecards

Using quarterly service performance scorecard for the departments may include other aspects of ministerial performance such as strategic/operational targets (for mission attainment), internal processes (for ministerial efficiency), and staff development/growth would align well with sustaining a sound service-delivery culture in the Ministry.

9.2.5 Ministerial Service-Performance Traffic-Light System

Ministerial service-performance 'traffic-light system' could be employed for tracking progress on performance targets. In this system, performance issues are colour coded like a 'traffic light system' (RAG: Red-Amber-Green) to help quickly identify problem areas. Areas that are 'green' indicate that progress is according to plan; 'Red' means progress is off plan and intervention is required; 'Amber alerts the Ministry that progress is off plan but not to the point where an intervention is urgently required.

Section 10: Action Points

This section highlights some action points that are expected to guide the implementation process of the CP.

Table 5: Action points

S/N	Action
1.	Present the draft CP, SC and JDs to the Honourable Commissioner, Ministry of Health for inputs and approval.
2.	Base on the approved JDs, Directors of each department shall develop JDs for all key positions in their respective departments
3.	Present the draft CP and SC to the Institutional Development Council for further consideration and approval.
4.	Disseminate to relevant internal and external stakeholders, to gather support for effective implementation of the CP.
5.	Set-up a committee to oversee the implementation of the approved CP and SC.
6.	Update the Ministry's mini website (under the www.kdsg.gov.ng domain), to enhance its engagement with stakeholders and promote its operations.
7.	Collect gender disaggregated data for all levels and increase focus on ensuring gender balance in the staff recruitment and training.
8.	Mobilise resources for the realisation of the strategic priorities of the Ministry.

Analysis and Reporting

The completed form should be analysed, and a brief report produced, by the Department of Health Planning, Research & Statistics in collaboration with the Department of Admin & Finance.

Appendix 5: Service Standards Performance Appraisal Questionnaire for Clients/Stakeholders of Kaduna State Ministry of Health

<u>Note:</u> This form should be administered at a healthcare-services stakeholders' roundtable or forum. Such a roundtable or forum should be organised periodically, say, twice yearly, and different service areas may be selected for rating at different forums.

Introduction:

The Kaduna State Ministry of Health is committed to providing quality healthcare services to its clients. Your input will be useful to help identify some of the key areas in which to improve our services.

Section 1: Specific Service Rating

Please, help complete the form below by addressing each area of service: rating how the Kaduna State Ministry of Health currently performs and indicating your remarks/suggestions for action as appropriate.

For any service with which you have no direct contact with the Kaduna State Ministry of Health, please indicate 'Not Applicable or N/A' under the 'Rating' column.

S/N	Service Areas	Rating, 1-3; where 1 is 'Poor' and 3 is 'Good'	Remarks / Actions required
1.			
2.			
3.			
4.			
5.			
6.			
7.			
8.			

Section 2: General Assessment

- 1. Please rate your assessment of the overall quality of the services provided by the Kaduna State Ministry of Health. Choose one of the following options:
 - a) Good: operating to standard
 - b) Average: needs to improve
 - c) Poor: below average and requires service overhaul
- 2. What do you like the most about the Kaduna Ministry of Health and aspects of its services?
- 3. What do you like the least about the Kaduna State Ministry of Health and aspects of its services?
- 4. What do you think the Kaduna State Ministry of Health should improve on?
- 5. Have you, or your organisation, ever had a cause to complain about the Kaduna State Ministry of Health? Yes/No

If yes, were your complaints dealt with to your satisfaction?

Thank you.

Submission of Completed Form:

Please submit your completed form at the service standards stakeholders' roundtable to....

or

send it to the Director of Admin and Finance, Kaduna State Ministry of Health, Kaduna

Note on Analysis and Reporting

The completed forms should be analysed, and a report produced, by the Department of Health Planning, Research & Statistics in collaboration with the Department of Admin & Finance.
